

Green Roof Rebate Program

Structural Engineering Rebate Application (2013-14 Program)

The Structural Engineering Rebate (SER) can help defray the cost of a structural analysis for existing buildings smaller than 2,500 square feet. The incentive will be for the actual cost of the structural analysis, or up to \$250, whichever is less. To participate in this program, the completed SER form must be received before June 30, 2014.

Applicants who install a green roof must submit their applications with a structural analysis approved by a professional engineer licensed in the District of Columbia, along with a paid invoice, to initiate the rebate process. After the green roof has been completed and verified by The Anacostia Watershed Society (AWS), SER funds will be added to the final amount of the rebate. Property owners may choose any structural engineer licensed to work in the District of Columbia to perform the analysis. Contact information for the Structural Engineering Association of Metro DC, as well as private engineering firms, is listed on our website at www.anacostiaws.org/green-roofs. This information is for educational purposes only (i.e., AWS is not recommending or endorsing any companies listed there).

To receive this incentive, applicants are not required to install a green roof if the structural analysis determines that the building cannot support 30 pounds per square foot of additional load. If this is the case, applicants will qualify for the SER as long as the following documents are received before June 30, 2014: a completed Green Roof Rebate registration form, a structural analysis approved by a professional engineer licensed in the District of Columbia, and a copy of the paid invoice. The structural analysis must state the building **cannot support** the additional weight.

The required documentation can be sent by any of the following methods:

Email: greenroofs@anacostiaws.org

Fax: (301) 699-3317

Mail: The George Washington House, 4302 Baltimore Avenue, Bladensburg, MD 20710

Structural Engineering Rebate Application (2013-14 Program)

Property Owner (Rebate Recipient's) Name: _____

Printed name of Signatory (If organization is listed above): _____

Project address: _____

(All projects must be in the District of Columbia)

Date: _____ Date of submitted registration form: _____

Structural engineer: _____

I have read, understood and agree to the terms and conditions of the Green Roof Structural Engineering Rebate listed above:

Signature of Applicant: _____ **Date:** _____

Program Administered for DDOE by the Anacostia Watershed Society

Area below for DDOE / AWS staff

Date received: _____ Registration # in queue: _____
