

GREEN ROOF REBATE PROGRAM

Greening your wallet, building and city

The District's Green Roof Rebate Program is back in full swing – with \$5/square foot available on a first come first served basis for qualified buildings of any size! This program is now available for residential, commercial and institutional properties. You can begin the application process by visiting www.anacostiaws.org and clicking on Green Roofs in the right column.

Benefits for Building Owners

Cost Savings- Improved building and environmental performance; Reduced operating expenses; Stormwater management capacity on roof; LEED-EB credits and added market value.

Health and Aesthetics- Improved health and appeal for residents and tenants; Sound insulation; Improved marketability of the building; Potential to improve employee productivity.

Benefits for Your Community

Community Cost Savings- Increased stormwater retention; Reduced need to expand regional water infrastructure; Reduced greenhouse gases and ground level ozone emissions.

Improved Air Quality- Filtration of airborne particulates and production of oxygen; Temperature regulation of building and reduction of the Heat Island Effect.

Better Water Management- Stormwater retention, filtration, and temporal delay of stormwater runoff and reduced volume into local waterways.

Social Benefits- Improved neighborhood aesthetics; Increased recreation opportunities; Added habitat for wildlife; Potential for local food production.
