Prince George's County Clean Water Forum

Free And Open To The Public – Refreshments Served!

Date: November 10th, 2011
Time: 6:00 PM – 8:30 PM
Location: Forest Heights Mayor's Office
5508 Arapahoe Drive
Forest Heights, MD 20745

Are you tired of flooded streets and basements? Are you concerned about pollution in our rivers and streams? Do you worry about the safety of our drinking water?

If so, this Forum is just for you!

WATER POLLUTION

Most of the rivers in Prince George's County are polluted and filled with trash. Many of our county's streets and basements flood every time it rains. We need to get a handle on the water during rainstorms. There are attractive solutions that will clean up our rivers and streams, and prevent flooding. These solutions are green streets, green roofs, rain gardens and more.

At the Forum, clean water experts will discuss:

- Why we face flooding and polluted rivers
- Solutions to reduce flooding and water pollution
- The benefits of addressing water pollution
- What the county administration must do to reduce flooding
- What you can do to make sure that laws and regulations get implemented

TAKE ACTION:

- Come to the Prince George's County Clean Water Forum.
- Ask your county officials how they intend to improve and pay for stormwater runoff management.
- Watch out for the opportunities to offer public comment
