

Pick Up the Trash to Uncover the Treasure!

What is the City Nature Challenge?

The City Nature Challenge is an international event where individuals can document wildlife in their own cities. The CNC spans four days from April 24 - 27, 2026. Over these four days, individuals take pictures of wildlife and plants to upload them into the iNaturalist application. Participants have until May 10, 2026, to upload their photos. This is a great way to get involved in citizen science and help discover what species we have in our city!

Instructions:

1. Download iNaturalist
2. Create an account
3. Press the green camera icon in the bottom middle of the page to take pictures in real time or upload photos
4. Use the application's suggestion for species ID, unless you are confident otherwise
5. Once a species is IDed, press "Save"
6. Click the green refresh button in the top right to upload

Note: You can upload multiple observation at once, click the green refresh button once all photos are uploaded
